

CHALMERS

**Information requested by the Swedish Migration Agency
Extended time for finalising Master Thesis Work**

The student's personal data

Karan Bharti
970130-8398

I am the examiner for Karan's thesis, and I meet with him and his other supervisors regularly to monitor the progress of the work and advise. Karan is pursuing a thesis at Chalmers to obtain his Master's degree in Mobility Engineering. The completion of this thesis is a requirement for Karan to be awarded the degree.

- Admitted to the Master Programme, see transcript of registration.
- Start and end date of Master Programme, see transcript of registration.
- The number of credits of the Master Thesis Course, see transcript of registration.
- Start date of master thesis work, see transcript of registration.
- Expected date for finalizing the Master Thesis: 2023-09-20
- Between June 15 and August 15, master thesis work cannot be examined at Chalmers University of Technology.

Between June 15 and August 15, master thesis work cannot be examined at Chalmers University of Technology.

Karan started his thesis on April 6th, because a thesis requires 20 weeks of work (and allowing for some vacation time), I expected the thesis to be completed and presented in September.

Progress of Master Thesis Work

Today, I would estimate Karan's work to proceed according to schedule, since the thesis started about a month ago, I would say that 15-20% of the work has been performed so far.

Kind Regards,

Marco Dozza
Professor at Chalmers (M2 dept)
